## **Pediatric Risk Assessment Sleep Disordered Breathing & Airway Obstruction**

905 Calle Amanecer, Suite 265 San Clemente, CA 92673 (949) 388-0780 OceanViewDentist.com General & Cosmetic Dentistry

The latest biomedical research is uncovering the link between sleep-related breathing disorders (SRBD) and our overall health. The American Dental Association (ADA) Council on Dental Practice made a Policy Statement emphasizing the important role dental professionals play in screening and either treating or referring for sleep, breathing and airway related disorders. In compliance with ADA's position statement, we are providing this screening questionnaire to our patients.

## Did you know that:

Patient or Guardian Signature:

- Obstructive Sleep Apnea may reduce a child's IQ for the rest of their life.
- Airway obstruction is linked to ADHD, learning disabilities, behavior issues, anxiety, aggression, allergies, asthma, and chronic inflammation.

## Does your child: (check all that apply)

Yes= 1 point, No= 0 points

☐ Snore while sleeping?

	Mouth-breathe while awake or sleeping?					
	Breathe audibly/noisily while awake or sleeping?					
	Ever gasp or wake with a startle?					
	Appear to stop breathing when sleeping?					
	Have nightmares?
